Summary

The purpose of the bus stop inventory is to locate all LYNX bus stops using Global Positioning Satellites (GPS) and identify attributes for each stop in a Geographic Information System (GIS) database. The bus stop inventory information will be used by LYNX external customers for general reference and various LYNX internal departments to track assets, complaints, and incidents, and to respond to customer inquiries.

Description

The Bus Stop Inventory provides a spatial location and amenity information for each LYNX bus stop.
